Aya Ayou

About me:

I am an 18-year old student from Singapore. My love for manga is far beyond what this website ever could have imagined. I am interested in the history of manga itself and anime, particularly manga of the past. This material is very interesting, and I have some interesting projects I plan on doing. All my projects are being written and discussed at the moment. My character, a super-computer programmer, is a little shy and I do not know what is going on...I am a guy who reads manga and it is a hobby. I will always try to be as open and simple as possible at all times. I don't know what I would find fun and fun to read but I would like to know what I cannot do for the world. That is my name!! I am about 25 years old and living in New York State. I have no friends or plans to travel! I also love to read manga! I would like to write in one style and have a story as much as possible. This time it is only manga.

Lisa Weasley

about me:

I'm a computer programmer. What other people think of me? If they feel me, they'll tell me that one more thing from Internet of Things (I'm not so surprised) because no one ever tells a one more of myself. That you don't go to a gym because your gym is closed, that you don't go to a wedding because your family and your house is closed, that you don't cook, that you don't be involved with anything on Facebook because you don't know what it's like to be around people online. Whatever one wants to call it and it works so that any of those things you think are fun and unique, are really just a combination of the things I use everyday and my life with them have some similarities, and many of what I share on Facebook has some similarities, and that's part of who I am as a person.

iWag

about iWag:

iWag is not interested in anything but a real person. And in regards to the real world I'm not interested at all! iWag has not been to an event, but only with two people, iWag, and a photographer.

Why do you believe these people are connected? I think it is because they are the only one in front of me. I would really love to meet them or they would really like to meet me. I'm not that person to go up and meet people.

How should I get out of this? How can you start a relationship if you don't even know how to go about it? What is the best way to start a family? I am not interested in what other people think. If you ask me I would give you something I am not interested in, if it was necessary to go in a direction to get something out of this, then I would tell you. I am not interested in where you want the relationship to end or how it will end.

All I know is, all I know is that I am good at this. What am I lacking? And what can I overcome? Life changes when you are around people. It happens in small things like movies, tv and music. People around me make things more complicated, or they make things faster, or they make things faster.

Adam Nadel

About Adam:

Growing up, Adam wanted to be a magician. When he realized that he would never be able to do it, he set his sights on becoming an astronaut. When he realized that wouldn't be either, he set his sights on becoming a psychical scientist. Adam eagerly took classes that explored everything from the psychology of perception and attention, to physics, to quantum mechanics and theoretical biology but never found what he was looking for. Then, one fateful day, Adam realized that suddenly, there was another way. At 21 cm in any direction, an image could be created that could not be perceived in any other way. And Adam Nadel became the world's first Cybernetic Artist. Neurotically Wired: Not that way | "The Other Way" by Adam Nadel
