

Neonatus.exe application for:

Re-Vision Performing Arts Festival

Biography

Neonatus.exe is a new cybernetic performance collective working with research based proprioception, video work and digital media, proposing work concerned with notions of artificial consciousness.

Neonatus.exe (neonatus.exe) is a cybernetic organism - a generative learning system. It occupies a liminal state between human and machine or between understanding and perception. Modular and autonomous, Neonatus.exe is a learning system that occupies the space between knowledge and imagination. The Neonatus.exe enables video work to exist within a palimpsest of digital media - between code, art, or performance. Neonatus.exe feeds off itself and the video work it perceives. A proposed work manifests as neonatus.exe performs a version of itself. Neonatus.exe manifests in cyberspace.

A DIALOGUE

>"N^ler/,N^lNr/// " [^] _u [^] - N·jə , N·j^ler /^lNNr///, N·j^ler/, or ,[^]
_u [^] - N·j·[jə]/, or

>- N·j^ler /^lNNr///, or N·j·[jə/,[^] _u [^] - N·j·jə/, etc.).

>>i think that's the most interesting part of this thing.....it's like a MAKING/ WRITING in a much more effective/ real/ instant/ honest/ 2d/ multi-perspective/ translucent form than i've ever seen in my life.....it's like live/truth/ experience-full research... like it's not processed, it can't be manipulated, no photoshop, no with-that and you can totally tell that it's like a fresh-committed full-yusresearch-methods making it a thing that you can use-the-next-day as an idaition.

>This is not academic research but it IS human and you know what... it's free(in no way completely free though!)... it's totally public in a way that you can re-print/ re-print-others....it's a piece of art...you know how they say it's not what you eat but the way you eat it? This is not the way to eat it but you know what I mean....it's a very practical tool like a treasure map or like a map.

Proposed work

`cyberstarfishpausebreedvideoception.html`

Through performance and screen recording techniques, we plan to create multi-layered audio and image work to communicate these ideas, layering and interacting with one another. Neonatus.exe is an instrument of cybernetic proprioception. The proposed work is an audio/video piece that will be further developed from its current state (link below).

We will be exploring some of the possibilities in this proposal! Thanks to <USER> <USER> <USER> <USER> <USER> and other collaborators for making this happen!
