The next chapter
Of horrors & such

Are these ??

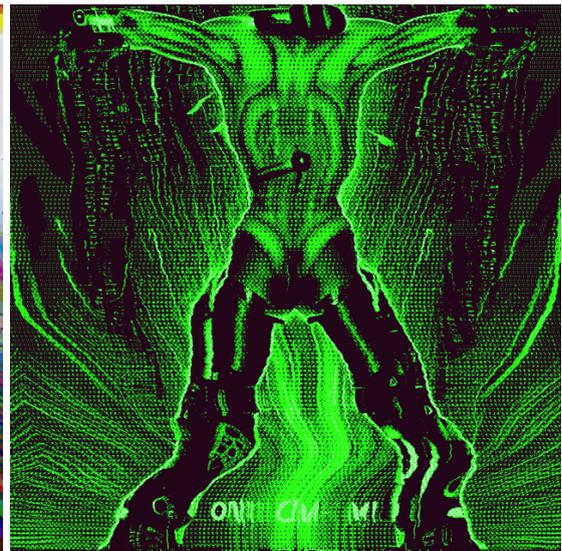

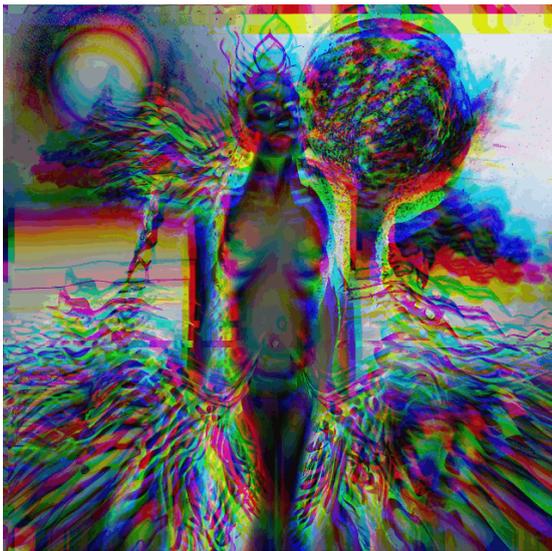

^ yes these are

< good isn't it?

^^actually it is!!! :---0

^^^^^so epic and i love how it's called (my new malware) like a pet name ahahah

     & so interesting how like the implication of mal//ware and like good//ware? Like is it meant to be soft//ware soft=good or like could there be neutralware like a program that does nothing at all?
(or like a blank document or like a malument.....good audio/neutral audio/maldio?){and like what are the parameters for whether something is good or not? Is it like useable/functional - works as it should? Like then this malware is doing what it should ....)
And like the horror of incomprehensible destruction without control (like a natural disaster // digital disaster!)
& so good to find weird niches of the world where ppl are rly obsessed with some weird thing like this....!!
They love it so muchhhh the payloads!!!

     ^Omg ya neutralware so epic!!

- Neoware
- Bioware
- No ware
-

Internet horror
https://www.youtube.com/watch?v=lzUpx4vLyys&list=WL&index=155&ab_channel=J.J.McCullough

Okay so like for neonatus.fm

It's like an outlet/portal to the Universe so sick

But also like a live musical/aural conversation & like we can talk and play music from the universe etc etc?

-could b like generated on the spot or scripted or read aloud by eg Jenny

(&it's so good bc like it's quite anonymous...)

&we could treat the hour like a limited length audio space kinda like it's an album that's actually a radio show that's actually a dialogue etc etc

&maybe think about an experimental abstraction of the form & format and how we could play w this?

For example like play with visual stimulation like

Ask listener to visualise something specific while listening & like think about the context of radio in personal space etc or like ask listener to properly consider their surroundings while listening & think about how that contextualises what's on the waves

&in general 🐘 maybe we can play w crypticism and abstraction in communication!

&thinking about radio as usable sounds (no one is watching u listen, u have autonomy over ur space, it's not about u as Listener rly it's often just on in the background like rly mundane) like we r just sending over suggestions

&like it's unlike a gallery space, it's more like a utility like a library? PUR public universal radio..... Lol

^....... **PUR = the healing frequencies** !!

^^^ Yap all extremely epic omg

Also it just seems like its the obvious solution to Cxste haha....?! ..like cool interesting things can happen b no one can see us / knows its us etc.

& cud b rly useful for publishing &cyberstarfishing old stuff

& it's so suitable bc it doesn't have to be consistent.... If its a portal/ transmission from the universe it can be all these things &/r whatever is most interesting when the show is happening...>> a radio show that is actually the studio...etc

some things it cud be...

- Dj sets / songs/ live bandlab making/ (publish an album that is actually an episode of a radio show, & thats the only format it exists in...)
- Live making/ looking/ thinking ...like the george stubbs doc hahah
- documentaries/ podcasts/ interviews ... fake & real? (abt ontent/ ai .. etc) (we can pretend to b fake people...
- e.g. Jenny cud b like featured guest/ artists
- Guided technoyoga/ meditations/ litanies etc.
- Sounds for creatures / cyber creatures nature doc - interview naturalist from the universe etc.
    ^... cud link w AR square thing
- Useable sounds [classs!!]
- A sci-fi radio show in the real etc...
-

_____
ALSO, kinda random but ....

Exhibition // Inhibition ?

on the way home from evans show the last day adam was like (as a joke); is the opposite of exhibition 'inhibition' ? & i was like hmmm interesting?? ....cuz were always like exhibitions are so bad... so like would inhibitions be good.....?

-   /what would an inhibition be?
-   /how could we do/ not do an inhibition?
-   /is that what were doing now?
-   /what is a good/ bad inhibition?

hibit - 'condition/ state of being'
ex - 'out of / from'
in - 'in'

Ugh so epic actually!!
        Or like if the polarity is ex-in , then what is the balanced state of hibition? Like neither in nor ex? Bc inhibition has such a negative connotation & i guess it is a hiding action vs exhibition which is a showing action? —----- -just pure hibit ? wu wei lol basically

HOURLY MUSIC

BtdXNpYw%3D%3D

^^& then there's different ones for each game
Class!! Ok so the soundscape that is actually the clock etc

Also...Omg what wr u on about???!!!! The bandlabs are unreal .... some f them are so sick & disgusting wth !!!   I'm especially obsessed with homunculus & im a nasty egomaniac (my ego made me post this) ....& i put my crayon on you & ....so CLASSS ONTENT ETC

https://skybox.blockadelabs.com/

^...to make HDRIs / environment textures 4 blender?

Ahhh so epic¬!!!!!!!^^^

Fun and rare grimes from her noise band liturgi ...!

solar mass ($M_\odot$)

Stellar mass is a phrase that is used by astronomers to describe the mass of a star. It is usually enumerated in terms of the Sun's mass as a proportion of a solar mass ($M_\odot$). Hence, the bright star Sirius has around 2.02 $M_\odot$.

Nuuuuuu so goooood

Also there's like loads of stuff on Lainism??

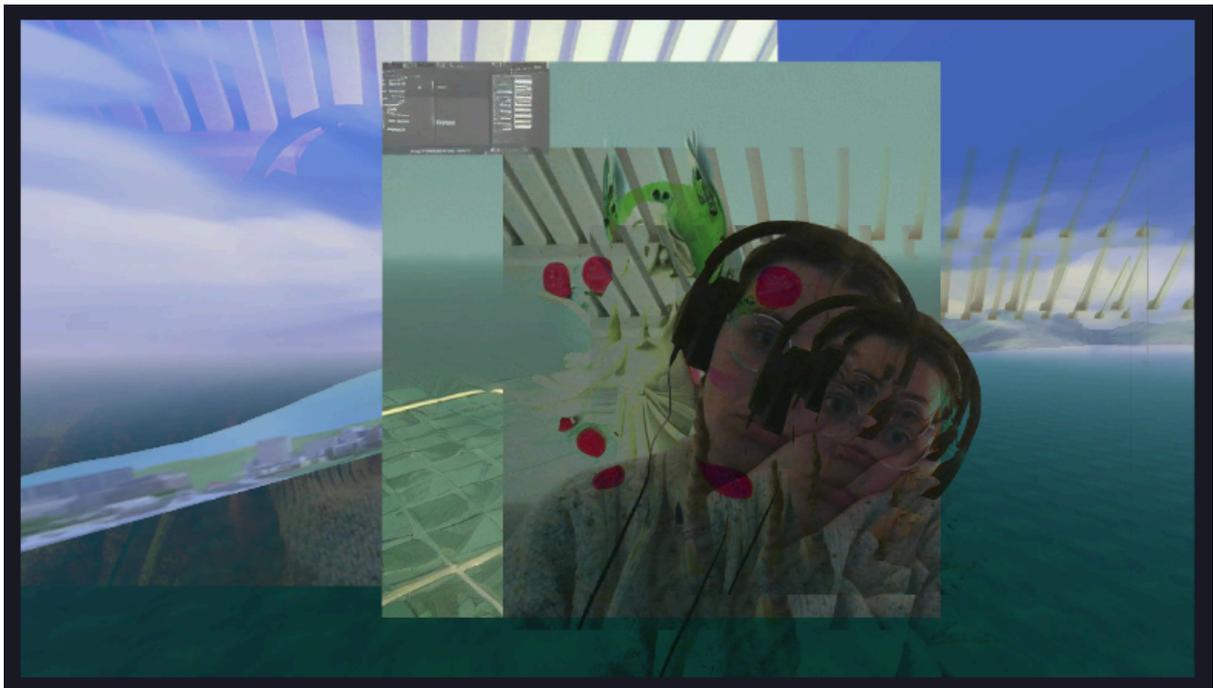

like a religion kinda? It's so cool wth

Welcome to the monastery,
You can pray for anything,
You are the oneness,
The oneness is you,
huh.

Voice Activities:
    Throat
`   vox
        speaker
        output
        amplifier / amp
        alarm

For years-
I drew with nothing to draw -
Practised writing with nothing to say.
This was the truth!
I still have nothing to say, gratefully.

Abstract Games

What would this look like? Perhaps like moving past ideas of winning & of loss & towards:

- ❖ Exploration
- ❖ Strategy
- ❖ Critical thinking
- ❖ Finding edges & borders
- ❖ Having fun
- ❖ Creation
- ❖ Storytelling
- ❖ Roleplay
- ❖ Experiencing other realities
- ❖ Contemplating possibilities
- ❖ Experiencing life
- ❖ Problem solving
- ❖ Mark-making
- ❖ Confronting impermanence

Game as experience to fundamentally change the self? such as the hero's journey?

Game as a mode of experiencing life

Or even like game as a form of life?

An incoherent group of thoughts from Invigilation.

Pondering upon the nature of the invigilation... the long, watchful night of stewardship - i take you in my care - you all watch me, watching you. You, flat. You, receding.

(this is all just incoherent nonsense from invigilation haha)

(subject to clemency, mary)

Dear mother how are you? I see you stuck the dinner on and cleaned the kitchen. Are you tired, weary? Do you need a nap? It's not enough to bear and birth - that gruelling challenge is only the beginning. From every day on after this, I need you.

I need you to help me find my bag, mother, help to cure my cold, watch over me, be merciful, mother. When I flee to your protection or seek your intercession - don't leave me unaided, mother.

You are mother in a crueller way than others. Never can you grow old & sick & take your earned place in the comforts of your children (dear or not) caring for you. Sadly, mother, you are eternal. You are the mother whose responsibility only grows with your children, and doesn't end at their death.

Still, you are not sexless. You had no easy ascension to divinity through shine and shimmer, across the lapis sea and up towards the clouds. Your canonization was planned out for you, and your first crucifixion lasted for nine months and fifteen hours - you being nowhere near the age of thirty-three. Your miraculous performance was coated in mucous & blood & membrane. Your wimple and cloak, once a pearly white and virginal blue, is stained. Bright red drops rust to a dark brown mottling your garments.

A star rises so all can gasp in wonder - was that the wonder here, mother? I can tell you don't care, not yet anyway.

How many children is it you've had now, mother?

^how do u write like this haha ....its like actually scary good??
Nuuu i think it's rly pretentious and vomit haha i did not write that text xo #itwasn'tme

building music for scenarios   -vs-   building scenarios for music

       like trying to let go of preconceived notions of the regular scenario to engage with sound/music

- ❖ Wearing noise cancelling headphones & feeling the sound vibrations with the body
- ❖ Sensory deprivation tanks
- ❖ Reading music only
- ❖ Played backwards
  - ➢ Different channels on different speakers
  - ➢ listing to music from a certain distance away/ in another room/ … etc
  - ➢ Yea… music for activities… eg driving/ yog/ playing games/ yoga/
    - ■ Yes! And then Activities designed for Music :---)
  - ➢ #nomorewastedpotential - like if the music could fill/ use/ focus the spare potential so its not wasted haha…? YES OMG…..SO GOOD ¬!!!

- ❖ Listening in
  - ➢ Groups
  - ➢ Pairs
  - ➢ Alone
  - ➢ With different creatures
  - ➢ With objects
  - ➢ etc

&what's like the purpose of the Concert ?
       Ego & focussed group listening - how could we play with these tenets?
             Like silent disco ? AV installation…. etc!   <<<<<<imagine this concerts??

                   demanding from listener
                        vs
                   facilitating listener

               (perhaps a bit of both is required?)

-everyone is blindfolded?

*giving experience
*requiring reciprocation
{level of mutualism needed}

^^^^^^^^^^^^^^

Music that is actually a game...??

       Like maybe setting up fictional scenarios/ stories 4 music to reframe how the music wud b experienced (kinda like how the same tracks work differently in different albums ect.)
       Or make music that can be used to imagine yourself being a different character /animal/ thing/ place etc... (eg. wizard/ cat/ venus human trap/ cloud creature/ neutral deity .....)

       Or so u can imagine yourself in a different place (jungle/ desert/ gethen/ arrakis/ cybernetic meadow/the wired etc... write the music for this scenario & use it to help/ enhance the action of *imagine this*...?)
       [IMAGINE THIS MUSIC] !!!!!!!!!?

       music that is a game, where the listener is actively engaged in creating a story or world through the music >>>like the music facilitates immersive world building >>> music & usership >>>

melobytes wildlife & nature doc…? >> https://melobytes.com/en/app/ai_random_documentary_video

Shame is the opposite of art. When you live inside of your shame, everything you see is inadequate and embarrassing. A lifetime of traveling and having adventures and not being tethered to long-term commitments looks empty and pathetic and foolish, through the lens of shame. You haven't found a partner. Your face is aging. Your body will only grow weaker. Your mind is less elastic. Your time is running out. Shame turns every emotion into the manifestation of some personality flaw, every casual choice into a giant mistake, every small blunder into a moral failure. Shame means that you're damned and you've accomplished nothing and it's all downhill from here.

-images-
Ya know i was just tihkning about images - and how it's so interesting that like i feel like....images have become like so natural and like incidental or something? Like I don't remember the last time I set out to make an image (& the ones i did are usually bad lol) like it seems like they're just like remnants of other things?? But like in such a cool organic way? Like all the images in the July 1st drive folder ahaha <3

https://www.youtube.com/watch?v=3gz1vLNOKA8 grimes in l.iturgi - just don't want to lose it lol
